## The P.U.R.E.™ System

### Precision UnResolved-materials Extraction™

P.U.R.E. is a unique molecular cleaning method developed by OII to remove materials and extraneous processing materials found in hydrophilic lenses that are not fully polymerized. OII lenses that go through the P.U.R.E. system have enduring optical clarity and enhanced biocompatibility. All OII hydrophilic acrylic lenses are currently being treated with this proprietary system.
